

Increased Operational Flexibility & Lower Execution Risk

aureus mining

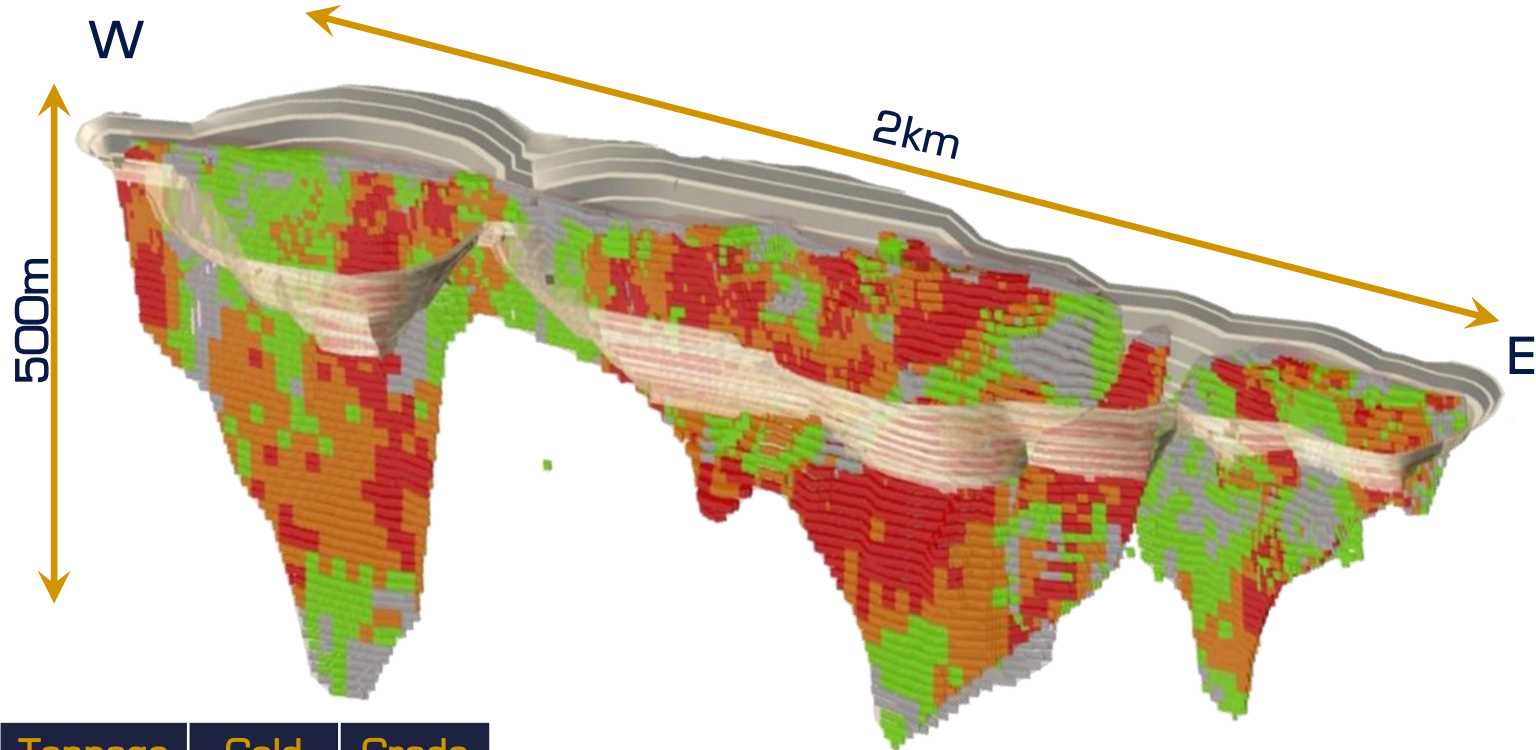

- Revised mining sequence from east to west to target higher grade ore earlier in LOM
- Two shallower starter pits and temporary northern ramps minimise waste haul distances and provides increased face length
- Drainage berm constructed from waste rock lowers execution risk and reduces water ingress and pumping requirements in pit

New Liberty: Pit Design

aureus mining

Legend	
Block model Au grade (g/t)	
Grey	< 0.8
Green	0.8 to 2.0
Orange	2.0 to 4.0
Red	>= 4.0

Category	Tonnage (Kt)	Gold (Koz)	Grade (g/t)
Proven Mineral Reserve	700	99	4.4
Probable Mineral Reserve	7,800	825	3.3
Total Mineral Reserve	8,500	924	3.4
